

UNC

UNIVERSITY OF
**NORTHERN
COLORADO**

Isabel Salsbury

Major: Biology, Secondary Education

Year: Senior

Graduation: May of 2021

Hometown: Greeley, CO

"Receiving the Nina Stulp Memorial Scholarship for Science Education was so important to me, especially this semester. I was forced to quit working so that I could student-teach, and this scholarship saved me from stressing about the financial burden this would create and instead enabled me to focus on my craft and becoming a master educator."

Nina Stulp Memorial Scholarship for Science Education

"I am currently student-teaching 6th and 7th grade science at Platte Valley Middle School in Kersey, CO. I absolutely love teaching because it is a combination of many of my passions. I feel that I am able to use my creativity when preparing my lesson plans, problem-solve, and talk about science daily. The best part of student-teaching is getting to spend time with other teachers and most importantly the children I am teaching.

After graduation, I hope to obtain a job as a middle school science teacher. I would like to serve as a teacher in an urban area and work with a more diverse student population."

Landon Sibley

Major: Math, Educational emphasis

Year: Junior

Graduation: 2022

Hometown: Thornton, CO

“The Nina Stulp Memorial Scholarship for Science Education has allowed me to focus on my studies and becoming a teacher without worrying about the stress of tuition. This scholarship alleviates so much of the stress of attending college, which has allowed me to pursue my dream of becoming a teacher.”

Nina Stulp Memorial Scholarship for Science Education

"I have always wanted to be a teacher, so I knew UNC would be a great fit. My mother, my grandmother and both of my sisters attended UNC, each of them had a wonderful experience and had nothing but the highest regard for the education they received here. Teaching was the only career that I have ever had interest in, and I also feel that it is a profession that will give back to me personally. Helping students and being there to support them the way my teachers supported me is something that I feel is challenging but equally rewarding.

I hope to get into the classroom as soon as possible. The more prepared I become, the more excited I am to start teaching! My goal is to work in a middle school classroom upon graduation."

Madison Reichert

Major: Mathematics, Secondary Education

Year: Junior

Graduation: 2022

Hometown: Peyton, CO

"Receiving the Nina Stulp Memorial Scholarship for Science Education meant that I could afford this semester without having to shoulder the financial burden of taking out additional loans. I am so grateful to not have to add to the debt I have already incurred throughout my education. I am so grateful for the support that this scholarship has provided me. Thank you!"

Nina Stulp Memorial Scholarship for Science Education

"The University of Northern Colorado was always a top choice for me. My high school guidance counselor shared that UNC had an exceptional Education program, and I knew I wanted to come here to pursue my dream of becoming a teacher. I am currently in the STEP 262 class this semester, to help me become prepared for student-teaching in the Spring of 2022.

I enjoy teaching because I love working with students. Math can be particularly challenging for many students to conquer; I want to demonstrate to my students that they are capable of achieving anything."

Nathan Carlson

Major: Mathematics, Secondary Education

Year: Junior

Graduation: 2022

Hometown: Greeley, CO

“The Nina Stulp Memorial Scholarship for Science Education helped relieve a lot of the financial pressure from me this year. I cannot express how much of a blessing it is. It is encouraging to know that someone would be willing to invest in me, I feel immensely grateful to be supported. I have been able to really focus on my studies and development as a teacher this semester; your investment in me will serve students for many years to come.”

Nina Stulp Memorial Scholarship for Science Education

"I chose to attend UNC because I have always wanted to be a teacher! UNC has an excellent mathematics education program.

I love teaching because I enjoy helping students understand what they are capable of. Many students label themselves as 'bad at math' while they are in middle school. I want to help students see that they can succeed when they are willing to put in the required effort!

Upon graduation, I hope to begin my life as a teacher. I want to get a job teaching mathematics in the Greeley area."
